Professional Summary

Detail-oriented Software Engineer and Junior Web Developer with a skillset in building responsive, user-first web applications. Experience with React, Next.js, TypeScript, and JavaScript for front-end development, and C# and SQL for back-end logic and data management. Also have experience in utilizing modern UI/UX frameworks like Tailwind CSS and Bootstrap to create seamless digital experiences. Proven ability to deploy scalable applications using Microsoft Azure and Vercel and collaborate effectively in stressful environments.

Education

CodeStack Academy: Full-Stack Software Engineering Program Sep 2025 - May 2026
~1000 hours of instructor-led courses and lectures in a fast-paced learning environment that cover various coding languages as well as services and systems used in the industry.

Technical Skills

- **Languages:** JavaScript, TypeScript, C#, SQL, HTML5, CSS3
- **Frameworks & Libraries:** React, Next.js, Bootstrap, Tailwind CSS, Mapbox GL JS, Vite.js
- **Tools:** Git, Github, Postman, Microsoft Azure, Vercel, VS Code, Slack, Restful APIs, Unity

Technical Projects

Personal Portfolio Website

Designed and deployed a responsive portfolio using Next.js and TypeScript to showcase my skillset and past software engineering projects.

- Implemented interactive UI components using **Framer Motion** and **Aceternity UI**, ensuring a modern and accessible user experience.
- Deployed the application as an **Azure Static Web App**, utilizing CI/CD pipelines via GitHub Actions for seamless updates.

Pokédex Web Application

Developed a dynamic search tool utilizing the **PokéAPI** to fetch and display complex species data, moves, and abilities.

- Engineered a recursive evolution chain visualizer to map out multi-stage evolutions for over 649 entities.
- Optimized data fetching with **Asynchronous JavaScript** to ensure zero-lag performance during user queries.

Experience & Volunteer Service

CodeStack Academy (SJCOE)

Nov 2025

Assisted in the pre-event setup for a large-scale E-sport tournament, coordinating the deployment of hardware and acquisition of software assets across multiple stations. Collaborated with a specialized team to meet strict pre-event deadlines for software readiness.

CodeStack

May 2026 - June 2026

Web Developer Intern

Collaborated with a team to develop an internal application for San Joaquin County of Education employees. Tasks included working in the backend with clean architecture APIs built with **C#**, frontend built with **Next.js**, and **SQL** with creating and updating tables in Azure data studio.
